# Wiskunde Mathematics

## Leerderaktiwiteitsboek Learner Activity Book

Afrikaans | English

Die ontwikkeling van hierdie werkboek is met die medewerking van die *Bala Wande-Magic Classroom Collective*-span moontlik gemaak, in oorleg met 'n verwysingspan wat saamgestel is uit individue van etlike universiteite, wiskunde-NRO's en die Departement van Basiese Onderwys.

Hierdie materiaal is gebaseer op die werk van die DBO-werkboeke en bestaande iterasies van lesplanne (GPLMS, Jika iMfundu, NECT en TMU).

Die Bala Wande-bokse met manipuleerbare items is in oorleg met Jade Education ontwerp. Dié bokse voorsien hoëgehalte-materiaal wat 'n integrerende deel van die onderrig-en-leerprogram uitmaak.

The development of this workbook was carried out by the collaborative *Bala Wande-Magic Classroom Collective team* in consultation with a reference team made up of individuals from several universities, mathematics NGOs and the Department of Basic Education. These materials draw on the DBE workbooks and existing iterations of lesson plans (GPLMS, Jika iMfundu, NECT and TMU). The Bala Wande manipulative boxes were designed in consultation with Jade Education. The boxes provide high quality materials which are an integral part of the teaching and learning programme.

Artists: Mary-Anne Hampton, Angie Bowring and Lexi Meier

## Die gebruik van die Bala Wande-leerderaktiwiteitsboek

In hierdie Leerderaktiwiteitsboek is aktiwiteite vervat wat vir 40 dae van onderrig in kwartaal 4 beplan is. Daar is konsepontwikkeling-aktiwiteite, individuele leerdersaktiwiteite en speletjies wat die leerders in pare en in groepe kan speel. Die oplossings vir die aktiwiteite kan in hierdie boek ingeskryf word.

Die materiaal word in 'n tweetalige formaat aangebied. Ons hoop dat die aanbieding van die aktiwiteite in twee tale die leerders sal help om vertroud te raak met wiskundewoorde in hul huistaal asook in Engels. Dit behoort hulle vir die lewenslange leer van wiskunde toe te rus.

As die leerders elke dag en elke kwartaal stelselmatig deur hierdie werkboek-aktiwiteite werk, sal hulle die hele wiskundekurrikulum vir die jaar dek. Ons hoop dat hierdie aktiwiteite 'n prettige manier bied om hulle te help om grondslagkennis van wiskunde op te doen.

Die aanvang van elke nuwe dag word met 'n pers banier aangedui.

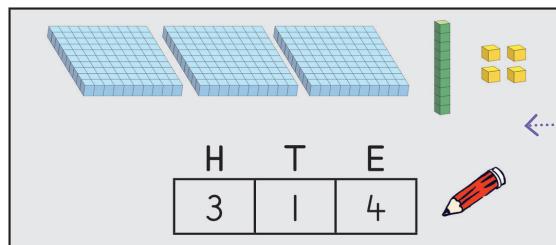

Onder die banier is daar 'n vloeidiagram wat die opeenvolging van aktiwiteite vir die dag oopsom.

Hoofrekene is die eerste aktiwiteit van elke dag. Die onderwyser begelei die leerders deur hierdie aktiwiteit.

Al die ander bladsye in die boek is vir die leerders wat selfstandig of in groepe, met die onderwyser se begeleiding en ondersteuning, daaraan moet werk. Dit kan die vorm van werkkaarte of speletjies aanneem om die begrippe wat op daardie dag behandel is, vas te lê. Speletjies word met behulp van tekenprente van leerders aangebied om te wys hoe die speletjie gespeel moet word.

**2** Skryf die getal neer.  
Write the number.

Alle instruksies en inligting word in Afrikaans gegee, met die Engelse vertaling daar onder.

Die leerderswerkkaarte bevat 'n uitgewerkte voorbeeld (deur die grys agtergrond en die rooi potlood aangedui).

Dag 5 van elke week word vir vaslegging en assessering beplan.

## Using the Bala Wande Learner Activity Book

This Learner Activity Book has activities planned for 40 days of teaching in Term 4. There are concept development activities, individual learner activities and games for learners to play in pairs and groups. Answers to the activities can be written in this book.

The material is presented using a bilingual format. We hope that presenting the activities in two languages will help learners to become familiar with maths words in both their home language and in English. This will equip them for lifelong learning of maths.

If learners work systematically through these workbook-style activities every day and every term, they will cover the whole maths curriculum for the year. We hope that these activities will be a fun way to help them acquire foundational maths knowledge.

The start of each new day is shown with a purple banner.

Underneath the banner is a flow diagram that summarises the sequence of activities for the day.

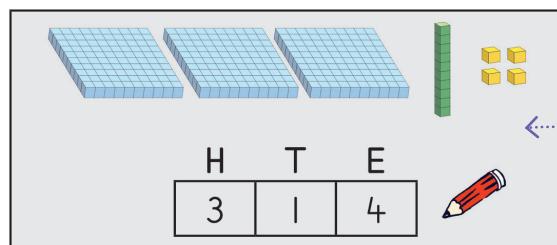

Mental Maths is the first activity every day. The teacher will lead this activity.

All the other pages in the book are for learners to work on independently or in groups with guidance and support from the teacher. They may be worksheets or games, for consolidation of the concepts covered that day. Games are presented using cartoons of learners to show how the game should be played.

### 2 Skryf die getal neer.

Write the number.

All instructions and information are given in Afrikaans with an English translation below.

Learner worksheets have a worked example (indicated by the grey background and the red pencil).

Day 5 of each week is planned for consolidation and assessment.

DAG 1 • DAY 1

**1** Skryf vermenigvuldigings- en delingsgetalsinne met behulp van die veelvoude.

Use the multiples to write multiplication and division number sentences.

**2** Verdeel die oliebolle onder die maats.

Share the doughnuts between the friends.

The activity shows 30 brown circles representing doughnuts. Two children are shown above the doughnuts, with lines connecting them to each other and to the doughnuts. Below the doughnuts, there are two columns of five boxes each. The first column is labeled "deling" (division) and "30 ÷ 2 = 15". The second column is labeled "vermenigvuldiging" (multiplication) and "15 × 2 = 30". Below these columns, there are two rows of five brown circles each, representing the doughnuts shared among the friends. The bottom row is labeled "deling" (division) and "vermenigvuldiging" (multiplication).

3

Verdeel 56 roomyse onder 7 kinders.

Share 56 ice creams between 7 children.

The most common shape is:

Wat is die verskil tussen die aantal ▲ en die aantal ●?

What is the difference between the number of ▲ and the number of ●?

## Kom ons praat Wiskunde!

Let's talk Maths!

In Afrikaans sê ons:

tellingsmerkies

piktogram

opskrif/titel

as/asse

benoem/byskrif

staafgrafiek

In English we say:

tally marks

pictograph

heading

axis/axes

label

bar graph

- 1 Teken die piktogram vir die data oor die vorms wat jy getel het.

Draw the pictograph for the shapes data that you tallied.

Onthou om die asse te benoem en 'n titel vir die grafiek te gee.

Remember to label the axes and give a graph title.

15

9				
8				
7				
6				
5				
4				
3				
2				
1				

Gesels met jou maat oor die data. Watter vorm is die algemeenste een? Die minste algemeen? Wat is die verskil tussen die aantal verskillende vorms?

Talk to your partner about the data. Which shape is most common? Least common? What is the difference between numbers of different shapes?

### Speletjie: 1, 2, 3 Wys - vergelyk!

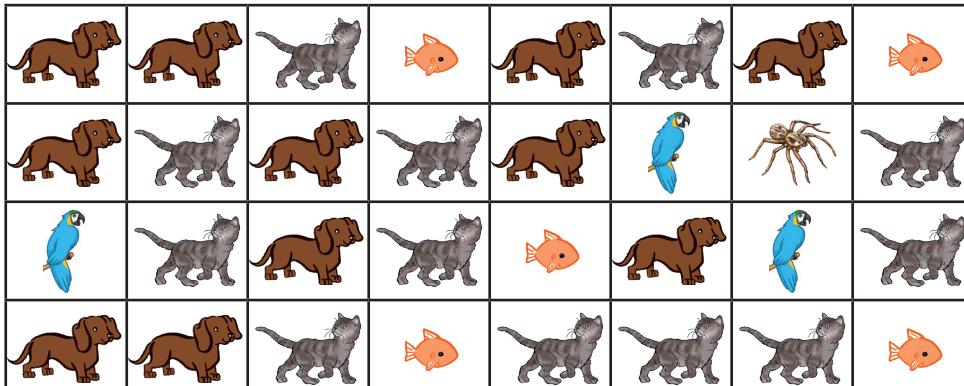

Game: 1, 2, 3 Show - compare

- Werk saam in pare. Wys 'n getal met julle spreikaarte.  
Work in pairs. Show a number using flard cards.
- Wat is die getal? Watter een is groter as die ander een?  
What number? Which one is bigger?
- Watter een is kleiner?  
Hoeveel kleiner?  
Which one is smaller? How much?
- Doen dit weer!  
Do it again!

- I Voltooи die tellingstabel oor troeteldiere.

Complete the tally chart about pets.

troeteldier pet	telling tally	totaal total

**2** Trek 'n staafgrafiek om die data oor troeteldiere te wys.

Draw a bar graph to show the data about pets.

Onthou om die asse te benoem en 'n titel vir die grafiek te gee.

Remember to label the axes and give a graph title.

Beantwoord die vrae met behulp van die grafiek.

Use the graph to answer the questions.

**Wat is die gewildste troeteldier?**

What is the most popular pet?

**Wat is die minste gewilde troeteldier?**

What is the least popular pet?

**Hoeveel leerders is daar in die klas?**

How many learners are there in the class?

Gesels met jou maat oor die data.  
Wat anders merk julle op?

Talk to your partner about the data.  
What else do you notice?

- 1 Vyf skole kompeteer met mekaar om te sien wie die meeste bome op Boomplantdag kan plant.

Five schools compete to see which can plant the most trees on Arbour Day.

Klipspruit	7
Mthonjeni	5
Sonskyn	7
Thutong	4
Mosiba	6

As = 10,  
hoeveel bome het  
elke skool geplant?

If = 10, how many  
trees did each school plant?

Klipspruit	Mthonjeni	Sonskyn	Thutong	Mosiba

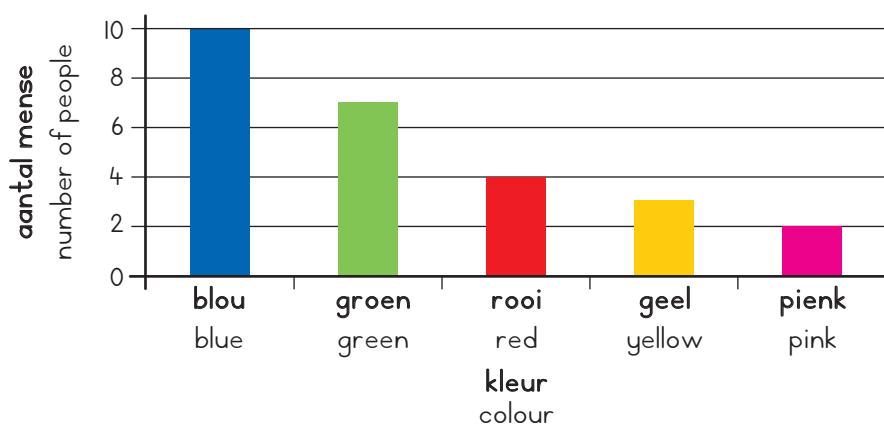

Hoeveel bome het die skole altesame geplant?

How many trees did the schools plant altogether?

- 2 Beantwoord  
die vrae met  
behulp van die  
staafgrafiek.

Use the bar graph to  
answer the questions.

Gunstelingkleur  
Favourite colour

Van watter kleur hou mense die meeste?

What is the favourite colour?

Van watter kleur hou mense die minste?

What is the least favourite colour?

Wat is die verskil tussen die aantal mense wat van groen hou en die aantal mense wat van rooi hou?

What is the difference between the number of people who like green and the number of people who like red?

Met hoeveel mense is daar 'n onderhoud gevoer?

How many people were interviewed?

### 3 Beantwoord die vrae oor mense se gunsteling-motorkleure.

Answer the questions about people's favourite car colours.

motorkleur car colour	aantal number	motorkleur car colour	aantal number
	22		20
	65		15

Hoeveel mense hou van motors in hierdie kleure?

How many people like cars in these colours?

22			

Van watter gunstelingkleur hou mense die minste?

What is the least popular colour?

Wat is die gewildste kleur?

What is the most popular colour?

Wat is die verskil tussen die aantal mense wat van silwer motors hou en die aantal mense wat van swart motors hou?

What is the difference between the number of people who like silver cars and the number of people who like black cars?

Wat is die verskil tussen die aantal mense wat van silwer motors hou en die aantal mense wat van rooi motors hou?

What is the difference between the number of people who like silver cars and the number of people who like red cars?

Wys hierdie data op 'n staafgrafiek. Gebruik die templaat op bladsy 96.

Show this data in a bar graph. Use the template on page 96.

DAG 5 • DAY 5

## Vaslegging Consolidation

WERKKAART  
WORKSHEETWERKKAART  
WORKSHEET

### I Trek 'n staafgrafiek deur die data in die tabel te gebruik.

Use the data in the table to draw a bar graph.

span team	aantal sokkerwedstryde wat gewen is number of soccer matches won
Super Stars	7
Bright Players	5
Black Cats	10
Fast Movers	6
Blue Pirates	2

Stel die data op 'n staafgrafiek voor.

Represent the data in a bar graph.

## 2 Beantwoord die vrae met behulp van jou staafgrafiek.

Use your bar graph to answer the questions.

Hoeveel wedstryde het elkeen van hierdie spanne gewen?

How many matches did each of these teams win?

Super Stars		Black Cats		Fast Movers	
Bright Players		Blue Pirates			

Wie het die meeste wedstryde gewen?

Who won the most matches?

Wie het die minste wedstryde gewen?

Who won the fewest matches?

Wie was tweede?

Who came second?

Wie was tweedelaaste?

Who came second last?

Wat is die verskil tussen die Super Stars en die Black Cats se wenuitslag?

What is the difference in wins between the Super Stars and Black Cats?

Met hoeveel spanne is daar onderhoude gevoer?

How many teams were interviewed?

## 3 Trek die tellingsmerkies om by die getalle te pas.

Draw the tally marks to match the numbers.

29	
48	
56	
31	
13	

## 4 Skryf die getal neer wat by die tellingsmerkies pas.

Write the number to match the tally marks.

Dag 1 • Day 1

**Wys met spreikaarte en basis 10-blokkies.**

Show with flard cards and base 10 blocks.
